

CARNATIONS, our eternal passion

M&J FLOWERS is a company that since 2011 produces beautiful carnations with an intense color, robust stem and long durability, located in Ecuador on the slopes of the Cotopaxi volcano in the province of the same name. M&J's collaborators are mostly women heads of household of indigenous origin who produce flowers for the USA, **Russia, Australia, Japan, Qatar, Vietnam, Spain and other countries**, adapting to the packaging requirements of each destination (10, 20, 25 stems per bundle in boxes from 200 to 500 stems).
